

## MISSION STATEMENT

*The mission of the Testing Center is to assist all students in assessing their knowledge, skills, and abilities as they relate to higher education. This is accomplished through the use of testing instruments that have been selected based on their wide use in higher education with consideration given to the validity, reliability, effectiveness, and cultural fairness of the instrument. The Testing Center adheres to the highest standards of testing protocol and operates in compliance with institutional, state, and federal regulations with special regard to test security and client confidentiality.*

*The Testing Center remains dedicated to the respectful use of tests through respect for the individual and the instrument. All work is undertaken for the benefit ultimately of those who are tested. The Testing Center is committed to using appropriate instruments as it relates to the needs of the individual regarding test characteristics and limitations. Further, the Testing Center is here to promote the student's personal and social growth and to meet special needs students through objective measurement on which we can base educational decisions, program evaluation and research, placement and mastery.*

*To this end, the programs and services offered by the Testing Center strive to support and enhance a student's formal education, with a spirit that moves the student toward a successful future that will be an asset to him/herself, the University, and the community at large.*
